

Education	
Master's in Engineering Management with I.T specialization, from Christian Brothers University with 4.0 GPA.	
Bachelor's in computer science, from Amrita Vishwa Vidyapeetham, Coimbatore with a 3.2 GPA.	
RPA Certification:	RPA Developer Certificate – UiPath ID: 335060836941348828
	RPA Orchestrator 2018.2 Diploma – UiPath ID: 379 30 191172 1553965257
	RPA Security Training Diploma – UiPath ID: 458 57 191172 1553974181
	Robotic Process Automation Professional – Blue Prism ID: Verify
Technical Skills	
Automation and Intelligent Automation:	UiPath Studio, Orchestrator, REFramework, Power Automate, Kindo AI Agents, Document Understanding, Process Mining, Task Mining, Communications Mining, Automation Hub, ABBYY OCR; reusable frameworks, queues, triggers, and exception handling
Development, Databases, and Integration:	Python, C#/.NET, SQL, HTML, XML; SQL Server, MySQL, Oracle Database, Caché; Visual Studio, PyCharm, IntelliJ IDEA, Eclipse, RIDE; API integration, Postman, NuGet, GitHub, GitLab, Bitbucket, Jenkins
Enterprise and Reporting Applications:	Oracle ERP, Salesforce, AppZen, SharePoint, ServiceNow, SSRS; reporting automation across SYNKROS, Stadium PLEE, GM Atlas, IGT EZ Pay, XpertX, Agilysys LMS, and InfoGenesis; comp-entry automation in iSeries CMS
Solution Design, Delivery, and Operations:	PDD/SDD, process mapping, development standards, code reviews, Jira, Confluence, MS Project, Aha!, AgileCraft, MS Visio, Visual Paradigm; production monitoring, incident resolution, VM migration, licensing, and workload planning.
Test Automation and Quality Assurance:	Robot Framework, Selenium WebDriver, HP UFT/QTP, HP ALM, Zephyr, TestNG, JUnit, AutoIt, Sikuli; regression testing, UAT, and custom .NET test libraries
Work Experience	

1. Station Casinos

June 2025 – till Date
- Lead Software Developer/ Solution Architect(Compliance Team)

- Architect and maintain **enterprise automation solutions**, partnering directly with the Director/VPs to define strategy, **solution designs, implementation roadmaps**, and delivery priorities.
 - Designed a **reusable framework** for sequence-based processes, established development standards, and migrated approximately **160 inherited automations**; developed 21 additional processes using **UiPath REFramework**.
 - Increased production success rates from approximately **85% to 94%** and reduced daily developer troubleshooting effort by **more than 75%**, from at least **four hours to under one hour**, through framework and operational improvements.
 - Own production operations for **241 processes** supported by **11 unattended bots**, with **180+ processes running daily**; oversee monitoring, incident resolution, and recovery, and standardized production VMs while completing their migration from **Windows 10 to Windows 11**.
 - Developed **21 processes** using **UiPath REFramework** to support business automation requirements alongside the standardized sequence-based framework.
 - Conceived, architected, and developed a **SharePoint self-service portal** integrated with **Power Automate** and **UiPath Orchestrator APIs**, enabling business teams to initiate automations on demand.
 - Built and deployed a **Kindo AI agent** that reviews **ServiceNow** tickets to assess new-hire application access against **compliance policies** and supplies assessment results to downstream UiPath workflows.
 - Automated **report generation and delivery** across casino and enterprise applications, including **Stadium, OracleGM, Atlas, EZpay, SSRS, CMS, LMS, Infogen, Synkros, FileBound, and XpertX**.
 - Own **licensing, budget decisions, hiring, and automation prioritization**; lead workload planning and task allocation across production support, enhancements, and new development within a **three-person team**.

2. Dish Network

May 2024 – June 2025

Senior Software Developer/Architect(Intelligent Automation - CFO Team)

- Architected and delivered an end-to-end utility bill automation using an ML model deployed through Ollama and integrated with RPA, extracting data from **40,000+ bills across 1,200 vendors** and delivering **\$80,000 in monthly savings**.
- Implemented document classification and information extraction using open-source ML models, **spaCy**, and **Transformers**, supplying structured data to downstream automation workflows.
- Delivered full-lifecycle **UiPath automations** for Fixed Assets across **Oracle Fusion Cloud ERP, Aura Player, NexSysOne, and Orbit reports**.
- Applied **ABBYY OCR, AppZen, and UiPath Document Understanding** to automate document processing and improve Accounts Payable workflows.
- Developed **Python** routines for HTML and PDF processing and built **API integrations** to extract and exchange application data.
- Evaluated business requirements and application capabilities to select appropriate UI automation, API, and AI/ML approaches; partnered with stakeholders to define scope, delivery timelines, and deployment plans.
- Improved exception handling and optimized production workflows to achieve approximately **95% automation success rates**.

3. Nielsen

June 2019 – May 2024

Robotic Process Automation Developer/Architect

Products: TLR (Total Line Reporting) Salesforce, BI Reports, iHeart Reporting

- Collaborated with senior leaders and key stakeholders to design and implement RPA solutions that met business needs and **reduced annual expenses by nearly \$500,000**.
- Provided **process analysis** and recommendations to Senior Management on the RPA ecosystem, **license types and numbers**, and resource, time, and cost savings.
- Established robust and scalable **development, testing, and production environments** for end-to-end automation projects that generated **over a million dollars in revenue annually**.
- Conducted architectural discussions/reviews of RPA stories and implemented the BOT using **RE Framework, dispatcher, performer BOTs, queues, and triggers**.
- Designed stable/reusable and scalable RPA solutions for automation involving **Oracle EBS ERP** using the **UiPath RE framework** and followed the best practices agreed upon in the organization.
- Coordinated with the **CoE** and the stakeholders on the **best practices for RPA solutions**.
- Started identifying processes using **Process Mining** and improved them using **Communications Mining and Document Understanding**.
- Optimized most processes by utilizing **API** and improved its efficiency by **35% on average** while maintaining high data quality and accuracy.
- **Reviewed code**, managed **licensing requirements**, and orchestrated the process (**robots, schedules, configuration files, assets, queues**, etc.).
- Documented the efforts in a **process definition document (PDD)** and a **solution design document (SDD)** (AS-IS, TO-BE, and flow diagrams) using **Task Mining** and **Automation Hub**.

Environment: UiPath Studio, UiPath Cloud Orchestrator, NET4.0, ASP.NET 4.0, C#, SQL Server, Oracle EBS ERP, Salesforce, Visual Studio 2017, Alteryx, NuGet Package Manager, GitLab, Postman, and AWS.

4. Nielsen Audio (Client)

February 2017 – June 2019

RPA Developer

Products: PPM (Portable People Meter), PPM wearable, PPM BT Collector

- Worked on RPA automation for PPM (Portable People Meter), PPM wearable, and PPM BT Collector projects using **UiPath and Robot Framework** to ensure the best quality of the applications, in an Agile practice environment.
- Worked with SMEs to create **POD (Process Definition Document)**, and **SDD (Solution Design Document)**, plan **RPA test strategy**, develop RPA automation suite, and execute and maintain the RPA test scenarios for PPM and all related projects.
- Developed an automated solution containing PPM test cases, work queues, and environment using **UiPath (RPA testing framework)** and integrated everything using **Jenkins for CI/CD** purposes.

- Played a significant role in successfully increasing PPM automation footprint coverage percentage from ~40% to ~82% by developing and updating the Automation Regression Suite using **custom .NET libraries**. Those updates enabled the automation suite to execute more efficiently.
- Experienced in using **UiPath Studio, Orchestrator**, Screen, Data & Web scraping tools. Also, I used **Visual Studio and NuGet Package Manager** to create custom libraries for UiPath.
- Built **four Automated Regression Test (ART) systems** (i.e. PCs that integrated Motion simulation hardware, Network power strips for BT beacons, Power circuit timers, Decibel meters, and Audio playback devices) to support our RPA automation testing. This helped the team significantly to reduce the time to complete a regression cycle from **60 days to two sprint cycles (20 days)**.
- Experienced in controlling the BOTs using **RPA administrative/Orchestrator**. Also used the **Windows Task Scheduler** to substitute the work done by Orchestrator.
- Part of a PPM wearable (Prototype) team to develop a **Robot Framework automation** using the **Selenium** library on **RIDE and PyCharm** editor for keyword-driven development (KDD) to test PPM wearable devices. Also, was part of a wearable proof of concept panel and provided feedback to the field panel administrator.
- Part of a PPM Collector (Prototype) team in automating the functionality of the prototype PPM Collector made from **Raspberry Pi**. Used the RPA tool **UiPath** to automate the entire test suite.
- Analyzed, developed, and documented business/test processes using **Jira, Zephyr, and Confluence**. Also, was part of the **FMEA** team in identifying potential failure points in the BT Collector, PPM, and its related devices.

Environment: UiPath Studio, UiPath On-premises Orchestrator, NET4.0, ASP.NET 4.0, C#, SQL Server, Visual Studio 2017, NuGet Package Manager, Jenkins, Automation Anywhere, Microsoft Power Automate, Blue Prism.

5. Christian Brothers University

August 2016 – December 2016

Research Assistant - RPA

- Analyzed the **requirements** of the stakeholders and prepared **RPA design documents**.
- The data collected was processed using **open-source RPA tools** and forwarded in the form of **CSV files** to a Ph.D. student for further research. The work has been completely automated using RPA, and scripts are now automatically run, and **data is collected daily**.

Environment: RIDE, PyCharm, SQL Server, GitHub, Sikuli, AutoIT.

6. BWAY Corporation

June 2016 – August 2016

Summer Intern – RPA Analyst

Products: IMS (Inventory Management System)

Clients: In-house Products

- Implemented **end-to-end robotic process automation (RPA)** by combining different types of applications (**Web-based, Windows-based, and mainframe**) using **UiPath**.
- Supported the development of product deliverables in the product roadmap with the **functional requirements documents**. Also, gradually built a **knowledge base** of new and existing functionality to improve requirements process efficiency.
- Developed robotic bots using **UiPath** to automate the process which was done using manual interference.
- Performed **database imports** of client inventory, employee, supplier, and cost center data into various platforms of **SQL Server** instances using RPA.
- Identified root cause and developed numerous **custom activity libraries** using **Visual Studio and NuGet package manager**. Also maintained various development builds using **GitHub**.
- Worked with the development team, QA team, and non-technical stakeholders throughout the **SDLC** process on a story-by-story basis in **identifying bottlenecks, testing, and refining** each feature.
- Managed the **backlog of user stories** by working closely with the developers and assisting them with the business and design questions as needed.
- Was responsible for **User Acceptance Testing (UAT)**. Worked with the product owner to create **UAT scripts**.
- Developed **standard operating procedures** document and conducted **user orientation and training** on the products.

Environment: UiPath Studio, UiPath Orchestrator, NET4.0, ASP.NET 4.0, C#, SQL Server, Visual Studio 2015, NuGet Package Manager, GitHub, Oracle DB.

7. Christian Brothers University

January 2016 – May 2016

Graduate Assistant

- Assisting the professor in **teaching classes** and **grading assignments**, as well as clearing questions of students.
- Also **conducting labs** for the students to give them practical knowledge of the subject.

8. Atlas Healthcare Software

December 2011 – July 2015

Analyst

Products: Atlas LabWorks EMR, Enterprise Master Patient Index, EHR

Clients: Mayo Labs, Sunrise Labs, St. Jude, Baptist, AEL.200 Clients.

- **Supervised a team of 3 Junior Analysts**, each specializing in a different product line.
- Member of the **change management committee** and was involved in change order proposal meetings with clients. Managed the **functional design** portion of SDLC across multiple product lines utilizing both **Waterfall and Agile methodologies**.
- Liaised between the business and technical personnel to ensure a mutual understanding of **HIPAA** processes and applications.
- Engineered product designs, **FSDs, BRDs, and UMLs** to document enhancements when required.
- Used **the data scraping** method for extracting structured data from browser applications or documents into a **CSV file or Excel Spreadsheet**.
- Worked on **standard RPA framework** for creating and designing the Sequences and processes.
- Built a system for **statistical reports** and conceptualized designs for an entire **billing module** for the application.
- Responsible for providing **functional training and support** to members across all teams in the organization.
- Designed **RPA test case suites** and performed **user acceptance testing (UAT)**, monitored client workflows for possible design and UI gaps.

9. Sri Balaji Web Hosting

May 2011 – December 2011

PHP developer

Products: In-house e-mail and SMS module

- Worked as a **PHP developer** for 6 months gaining insight about how to **develop and host websites**.
- Engineered **user activity diagrams** to chart the **functional workflow** across the product.
- Have done many projects in **PHP**, one of which is an **SMS and E-MAIL Module** for Experts Academy (a consulting firm located in Chennai) and **two plug-in modules**.
- Provided end-to-end **testing support** to all departments across the **SDLC**.
